Anthroposophic medicine today, in spite of the existence of other forms of alternative medicine, is still a significant force in healthcare. Anthroposophical Medicine is a philosophy developed by Austrian spiritual teacher Rudolf Steiner. Anthroposophic medicine is a form of holistic medicine that takes into account the whole human being in its entirety.

Today, anthroposophic medicine uses the full spectrum of study designs. As anthroposophic medicine is so timely because it takes into account the person comprehensively, in his or her whole personality. Patients today do not want anthroposophic medicine at the University of Michigan? Say it ain't so! Anthroposophic medicine was developed in 1920 by Rudolf Steiner and the medical doctor, Ita Wegman. Anthroposophic medicine is the creation of Rudolf Steiner, who also founded Waldorf Schools. It is a form of alternative medicine. It is rooted in the science-based medicine of the present, but takes into account the whole human being in its entirety.

Today, university chairs for AM (three in Germany, one each in The Netherlands, and one in United Kingdom) are a common sight. One of our major challenges in alternative/integrative medicine is to establish meaningful bridges between disciplines. Part of this involves the need for scientific support for the future of anthroposophic medicine. Today's practitioners of anthroposophic medicine must take into account the whole human being in its entirety.

Medical realities of your condition. Anthroposophic medicine is a form of medical practice developed by Rudolf Steiner.
