Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython

by Wes McKinney

Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython is a book by Wes McKinney that teaches data analysis using Python. The book covers data wrangling with Pandas, NumPy, and IPython, and is intended for those interested in learning data analysis using Python.

The book is part of the Python for Data Analysis series and is designed to help readers learn how to use Python for data analysis. It is written by Wes McKinney, the author of the popular book “Pandas: Data Structures for Analytics and Visualization.”

The book includes practical examples and exercises, as well as tips and best practices for using Python for data analysis. It is a great resource for anyone looking to learn how to use Python for data analysis.

If you are new to Python for data analysis, this book is a great place to start. It provides a solid foundation in data wrangling, which is an essential skill for anyone working with data.

Overall, Python for Data Analysis: Data Wrangling with Pandas, NumPy, and IPython is a valuable resource for anyone interested in learning how to use Python for data analysis. It is well-written, concise, and easy to follow, making it a great choice for anyone looking to learn data analysis using Python.
